There are more than 30 million AutoCAD users around the world, with more than 18 million active users in 2017. In 2018, the number of AutoCAD users worldwide was estimated to be over 20 million, representing an increase of 8.1 percent over 2017. There are several different versions of AutoCAD, including AutoCAD 2016, AutoCAD LT, AutoCAD Architecture, AutoCAD 360, AutoCAD Plant 3D, AutoCAD Electrical, AutoCAD Electrical Design, and AutoCAD Video. AutoCAD was the first commercial program to generate assembly drawing files in the 1:1 aspect ratio and was one of the first commercial CAD software programs to support freehand or vector drafting. Other such programs were developed in the late 1970s and early 1980s, including Vectric Vistadraft by Vectric, PTC Creo by PTC, and Softimage 3D by Autodesk. History [ edit ] AutoCAD's development history dates back to the early 1980s. In 1981, Hugh Mitchell, a graphic designer, was designing a small CAD program for his own use. In 1982, Mitchell was commissioned to program CAD software for a commercial software company. Mitchell contacted Michael Sugar to build a desktop graphics software application. Sugar joined Mitchell to help finish the work. The first version of AutoCAD was released in December 1982. In 1985, the first version of AutoCAD for Macintosh computers was released. The current version of AutoCAD was released in 1996. Version 1.0.2 of AutoCAD was released in 1998. AutoCAD was named one of the "Best of the Best" by the Popular Science Most Innovative Design Awards in 2005. Revision History [ edit ] The following table lists the major releases of AutoCAD. I am using the following rule (from FxCop rule source) to ignore fields with x-bump-version attribute: The problem is that this rule ignores all members of type bool including bool and void. Also, for fields I am using the following rule: This rule should be used only for XmlDoc attributes (xml and xsd). But it is not. It also ignores every type with the attribute and I cannot work around this. Is there any way to use this rule with less changes in the code base? A: You can specify your "Ignored properties" in the rule's settings a1d647c40b
