For example, if you only have one display, the Intel driver will fail to run under that restricted setup. Try a different Intel driver, or an AMD one, or use the computer in normal mode. If it still fails, set up a second monitor, and run in a normal mode, and make sure the hardware has both a video card and monitors.This may also work in a VirtualBox (Try to open the VM in normal mode, and make sure it can display the Windows desktop.)
