Rain water is commonly channeled through a

---

series of channels or troughs, which are joined at their ends and are suspended from the eaves and walls of a building. This type of rain gutter is generally of relatively low cost, but generally causes water to splash and to leak around the area of the window sill, where the troughs extend across the surface of the window sill. Consequently, substantial moisture is often found in the general area of the window sill, thus causing moss growth and other problems in the area of the window sill. It is an object of the present invention to provide a rain gutter which is of substantially improved construction over existing rain gutter constructions and which overcomes the aforementioned problems.

Inhibitory effects of protein kinase C isoform inhibitors in human breast cancer cell invasion through specific inhibition of platelet-derived growth factor-induced matrix metalloproteinase-2 expression. A critical issue in cancer biology is the development of more effective strategies for cancer prevention and therapy. Platelet-derived growth factor

---

(PDGF) is a potent inducer of cell proliferation and migration. The mechanism of PDGF-induced cell migration remains elusive. Several protein kinase C (PKC) isoforms are involved in the regulation of cell migration. However, the roles of PKC isoforms in PDGF-induced cell migration remain unknown. Here, we have investigated the effect of PKC inhibitors in PDGF-induced cell migration and matrix metalloproteinase (MMP)-2 expression in human breast cancer cells. PKC inhibitors, including GF109203X, H7, calphostin C, staurosporine, Gö6976, Gö

fellow workers: Koning and HÅ¼sken. 2006Â .Dyson Quantum has announced the Dyson Link that can essentially vacuum the air around your home. As the name suggests, the Link is a Wi-Fi-equipped device that you can use to place your Dyson fan in any room you want to improve the air quality, then download a smartphone app to monitor the progress and get notified when you need to re-clean the Dyson. "It's a new way to clean the air, and it was invented by a genius inventor," Dyson CEO and inventor James Dyson said. "You can never have too much air." The Dyson Link is designed to be modular so that it can expand to work in a home that's bigger than a single room. The device has a wall mount so it doesn't need to be placed on the floor, and a port for charging if you decide to move it or need to take it places where plugging in isn't feasible. Dyson says you can use the Link to focus on only one room at a time, or use it in conjunction with the included Dyson Link Mini to clean multiple rooms all at once. As for the air quality, the

---

Link is designed to be a smart air purifier that measures temperature, CO2, humidity, particles, and dust. As a result, the Dyson Link can be used to clean multiple rooms at once and is built to clean the air in every room in the home, even the attic and basement. "It's really effective when paired with the Dyson Desk, because you can monitor what's happening in every room," Dyson said. The Link is available today in select countries, and will be available in the US starting on May 29. It costs \$199.99 to purchase the Link, but Dyson says it will be available for sale on Amazon for \$49
