Field of the Invention The present invention relates generally to a method of preparing a substrate having a suspended microstructure, such as a micro-electro-mechanical system (MEMS) structure, via thin-film deposition of a bistable material. 2. Background of the Invention Stress-induced bistable materials (or SIBMs) are a class of materials that can exist in multiple stable states of compressive and tensile stress. These materials have been shown to exhibit electromechanical and mechanical properties of interest in a variety of applications, including switches, sensors, actuators, and memory devices. Significant emphasis has been placed upon the use of SIBMs in MEMS due to a variety of properties including large electrostrictive strain coefficients, piezoresistivity,

Tissue calcium and phosphorus in patients with septicaemia: a spectrofluorometric study. Tissue calcium and phosphorus levels were studied in 45 patients, 26 with septicaemia and 19 controls. Specimens for measurements were taken from liver biopsy, kidney cortex and at the femoral bone in the long bones. In these 45 patients the levels of phosphorus in all the tissues (except in kidney cortex) were lower than the control levels with the exception of the lumbar spine. In kidney cortex the levels were lower than the control levels. In the femoral bone, as compared with the control values, an increased calcium value was noted. Calcium levels of all the three tissues studied in patients with septicaemia were almost the same as, or lower than, the control values. During the press conference on January 25, 2019, Japanese Prime Minister Shinzo Abe announced his party would be debating a national security statute. And just days after that, on January 31, Reuters quoted Abe as saying that Japan would possibly consider ratifying the United Nations Convention Against Torture. Japan's government says it needs a security statute to fight terrorism and to protect their highly-secured population centers and infrastructure. The UN Convention was adopted in 1987, in response to torture and other cruel, inhuman, or degrading treatment which still occurs today. It defines the conduct of governments to be against law, but it is not ratified by all governments, nor has it ever been implemented, either nationally or internationally. READ MORE: Stephen Hawking: The End of Human Existence May Be Imminent [UPDATED UPDATE - 2019] "The Prime Minister has said that there is an increasing risk to Japan, due to foreign terrorists, based on the change in the international situation, on the basis of his argument that the implementation of the Convention Against Torture is needed," Chief Cabinet Secretary Yoshihide Suga told reporters at a press conference Saturday, regarding Abe's statement, the Japan Times reports. The UN Convention is about international law, and the Japanese government claims that it not only focuses on stopping torture, but also on
