You can enjoy the fabulous world of the Elden Ring using real-time action that's easy to understand. The online multiplayer mode supports up to six people and it features 3D audio and 3D graphics. In addition, RPG players can also experience the online multiplayer features of the game. In addition, we welcome your requests, and we will take them into consideration before determining the release date.

SENSENSE® A message from the developers ■ We are Tarnished, the Game - Learn More What is SenSu? SenSu is the name of the game's battle and development title, and it is a new fantasy action RPG that includes a rich world and plays like a JRPG. It is the gameplay that will be released first. ■ What is Tarnished? - Learn More The Tarnished Physical Character The story centers on a young man named Ulbert, who has recently returned to the Lands Between after ten years in exile. He becomes an adventurer

known as the Tarnished Elf, and struggles with his heart at the call of battle. ■ Development Team The SenSu Game Development Team We are Megatasia, a company that develops information technology and games. ■ Hime Kamikishiro - Background and Design “For a long time, I've wanted to make a fantasy action RPG. I thought the RPG genre was lacking in action, but I know the genre well, so I'm excited about the prospect of creating a new action RPG.” ■ Shuichi Miyazawa - Main Game Designer “Although SenSu is a new RPG, we have tried to keep the traditional RPG elements in the style of a JRPG, so it shares a lot of DNA with the existing series. We hope to create a new fantasy RPG that will surprise people with its action elements.” ■ Akira Minamiya - Illustrator “Although SenSu is the title of the entire game, it's not about battles. The art for the title is illustrated with the goal of creating an atmosphere of loneliness and drama, and the bonds of the characters are bound in the minds of the players.

Field of the Invention The present invention relates to a mobile phone in which a speaker is disposed under a housing. 2. Description of the Related Art Recently, mobile phones in which a speaker is disposed under a housing is often used. In the mobile phone, a speaker unit is disposed at a bottom of a small housing. If a user operates the speaker disposed under the housing, he or she can hear a voice which is returned by the speaker. However, if the speaker is disposed under the housing in the mobile phone, a voice which is returned to the speaker is low in volume. Further, when the mobile phone is carried, the speaker is

also vibrated, resulting in degradation of sound quality. Since the conventional mobile phone uses an elastic material for the mobile phone housing, when the mobile phone is carried, a resonance is caused in the housing. Thus, even if the mobile phone is not vibrated due to the voice of a user, the voice returns to the speaker with high volume. Thus, according to the conventional technology, in the mobile phone, the housing of the mobile phone is formed of an elastic material, and a thickness of the mobile phone is increased. Therefore, a thickness of the whole mobile phone is increased, and therefore, a size of the mobile phone is increased.
