### What's New In Photoshop CC 2018?

Q: Parse.com: Heroku integration: Error after updating to newest SDK version I'm developing an iOS app using Swift and Parse. I got the app to pass the Swift compiler and everything seems to be fine. After updating XCode and the Parse.com app, I keep getting this error: Could not load the default configuration. Please verify your project settings: Parse.Error.Code.INVALID\_APP\_KEY (code: 1, message: App key cannot be empty) Code for the error is:

```
Parse.Configuration.currentConfiguration.alreadyInBackground = false
```

```
Parse.Configuration.currentConfiguration.applicationId = "1234"
```

```
Parse.User.currentUser()!.setObjectForKey("app_key", forKey: "appKey")
```

I've tried removing the code altogether in my AppDelegate.swift file and that doesn't seem to work either. Any ideas what's wrong?

A: The appKey required by Parse.com is set in the App key in the iTunes Connect profile.
