Vedam Subrahmanyam Electric Drives Pdf Free As in case of constant velocity joint, the DoP does not provide sufficient lubrication for an EV electric drives. The journal bearing needs to be redesigned. The lateral thrust of the shaft on the journal bearing is not controlled by the DoP and even when the DoP is open, the shaft is likely to come in contact with the journal bearing. The shaft bearing is required to be designed with an adequate back-up margin to prevent contact with the journal bearing, whatever the state of the DoP.
