You know what, I'm sorry but if you ever pirate a game and lose money in the process, you're a bad person. Crysis was a good game, and the fact that it is going to ruin your day because you "dont own it" is pathetic. I appreciate you guys dealing with unauthorised content to make you better at your job. I know DFG is made to protect brand, i dont care bout that... But i just want to be happy and to play Crysis for free... Now i am happy and the game is free. This is my experience. Now i have free version and works very good. I know because im one of them trying to crack the code (for free). I know if you guys release an update, we could have a "professional cracker" version. I would charge a few cents to be part of group of elite responsible for protecting and supporting PC games. @DJICLOUD too bad about companies. Now a days you might not play crysis or get premium mode (if 1st gen is free) because of the DRM stuff, you shouldnt. You are hurting PC gaming, because some fanatics are able to charge for virtual rights. Its so sad. Greed for money has ruined the gaming scene. The recent hacking incident hasn't taken a back seat. We once again have a most amazing batch of games available on the most popular torrent sites. If you have an Xbox, Playstation, a Nintendo 3DS, a Wii and not interested in cracking PSN code or Mediafire accounts, you might just be interested in these titles. Usually, we see a lot of older titles appearing in this list, but this batch is a bit different. The game tells the story of a gigantic asteroid that crashes into a Earth in 2019. Things take a turn for the worst when the rock opens to reveal a 2km-high alien craft, and you're sent in as the leader of a crack squad of troops to investigate the frozen core of the problem. Shooting first, questioning later.
