To install this security update, you may be asked to restart your computer. Once restarted, the update will automatically start. See the Readme file in the download for your language for instructions on how to open and run the program. NOTE: This security update will be rolled out in two phases: (1) Windows Server 2003/Windows XP (through the Windows Server Update Services (WSUS) infrastructure) and (2) Windows Vista/Windows Server 2008 (through Windows Update, and possibly through WSUS if applicable to the environment). The earlier the adoption, the more resources are made available to complete the roll out. Criticality ratings will be adjusted as the roll out is completed.
