to say that the work on megamix was incredibly time-consuming would be a vast understatement. as of the time of writing, i've only skimmed through a handful of the nearly 100-manuscripts (as far as i can tell) that were originally written to assist with the final release. to say that the work is in a better state than it was at the time of the original release of the first beta on february 14, 2006 would also be a vast understatement. i've created and reviewed a few versions of the encyclopedia, as well as beta versions of the next two (0.5 and 0.6) of the two different guides released on the project's website. sonic 1 megamix 5.0 download i can't promise that this post will be of any actual use to anyone; i just wanted to share my thoughts on some of the project's history and why i've chosen to explain what happened rather than simply announce that the project has been cancelled. extra stages were added in sonic 3. each extra stage consisted of eight levels in a path that ends with a boss battle against a boss character from the game. sonic could receive points for completing these levels, but it was never possible to complete them without the character's help. there were four boss characters in sonic 3 that could be fought: tails, knuckles, shadow, and silver. this was the first game that sonic was capable of doing everything on his own. however, players could only play the extra stages once. if sonic died during an extra stage, the game would end. also, if sonic failed to defeat the boss, he would have to start the game over at the first level.

of course, the megacd version of megamix 5.0 is my primary focus right now, but the segacd version of the game will be tested in the next week or two, as well as the 'default version' which is based on the final version of the leaked build, which i've been calling "5.0d", but which i'm now referring to as "5.0c" just to avoid confusion. i plan to release the source code for the engine soon; if anyone has a particular purpose in mind for the engine, feel free to let me know. shadow's backstory is similar to that of the character of the same name from the sonic the hedgehog franchise. he was born in the laboratory of professor gerald robotnik on the space colony ark, an experimental expedition to another dimension. the colony was destroyed while a group of scientists, including robotnik, were traveling to it in order to study its ruins. as a result of this, shadow and his older brother robotnik were sent through a portal to the planet earth. shortly after arriving on the planet, shadow learned that robotnik had possessed the body of his granddaughter maria, who had died in an accident earlier. this motivated him to seek revenge on the scientist, not only for causing the death of his beloved granddaughter, but also for kidnapping him and torturing him to acquire the chaos emeralds. after witnessing a fight between sonic the hedgehog and eggman, shadow was inspired to assist the blue hedgehog, and became the first chaos emerald guardian and an ally of the blue hedgehog. with the help of sonic, shadow gained the power to control the chaos emeralds, and used them to enhance his natural abilities, although he also was not able to use the chaos emeralds without sonic's help. 5ec8ef588b
