the next most common and useful service repair is to reset the ip address. this can be done using the following steps: remove the power cable from the printer. carefully disconnect the ethernet port cable. if you need to unplug the printer for other reasons, use a non-metallic or plastic, or non-conductive, tool to remove the cable from the printer. unplug the power supply cable (c) from the power outlet. plug the power supply cable back into the power outlet and continue with steps 3 and 4. carefully plug the ethernet port cable into the ethernet port. turn the power switch to the 'on' position. the printer should restart automatically. if you are unable to turn the printer on or if the printer does not restart, please contact the epon service & support team at 562-276-1300 (u.s.) or 905-709-9475 (canada) () or work with a local certified technician. after a number of attempts to reset the ink counter to its factory default settings, i was finally able to. upon resetting the ink counter, i tested my printer with a few colors and found that the ink counter would not reset. i was able to clear the error messages by unplugging the inkjet cartridges. some users have reported that the counter does not need to be reset for some color cartridges. if that is the case, please let me know. if you have any questions, feel free to leave a comment. there is a tiny possibility that you may not be able to reset your ink counter. this is possible

when there are no ink cartridges in the printer, the counter is stuck at “00” and you have tried the steps outlined in this article. the following steps are only recommended for printers with memory card slots. if you have a printer with only a usb port and you have tried the steps outlined in this article, there is a tiny possibility that you may not be able to reset your ink counter. if you try to reset your counter and it does not reset, it may be the result of having only one ink cartridge in the printer and not the two ink cartridge. for such cases, you should try the following:

Reset Epson T60 T50 P50 T30 1390 0972984582.69

the epson printer error code 0972984582 is one of the most common errors that you will see in the epson printer. it is caused due to incompatibility with the cartridge or damage to the printer. the error code is usually displayed on the epson printer display screen. it may be possible to recycle the cartridge. if you have an epson ink cartridge, it is important that you find out the correct number of pins on the cartridge. if the pin number does not match the number of pins on the reset tool, then the cartridge cannot be reset. contact us at info@compandsave.com. replacing the epson cartridge will cost you more than simply recycling.

it's a better idea to refill your cartridge. if the pins on the cartridge don't match the pins on the reset tool, then it's not possible to recycle your cartridge.

here are the instructions on how to manually perform a reset on the Epson T60: from the computer where your printer is connected, locate the printer icon in the start menu. right-click the printer icon and select printers and faxes. click settings. select general from the left panel. click reset and restart. click ok. note: the recommended reset method does not delete any data from the printer. as such, it should not be used if you have data you wish to keep. only use this method if you have no data you wish to lose. note: if the printer is not an Epson printer, consult with an Epson customer service representative, who can help you. you can contact Epson customer support, click on the 'contact us' tab and select 'printer ink', or call 1-800-606-8200. 5ec8ef588b
