Highlighter The 'Highlights & Shadows' tool will be very easy for you to use, and most likely the one you will want to stick to for all of your edits. If you want to adjust things like 'Shadow', 'Highlights', 'Contrast', 'Saturation', 'Colors' or 'Luminosity' you need to have the layers you want to work on available. You can access a layer by clicking on the layer in the layers palette. You can also resize the layer by clicking the 'yellow box' of the layer and dragging it. When you select a layer now you can then edit it by clicking the eye icon that is located just to the left of the layer. e3d0a04c9c
